INTRODUCTION

Design freedom.
Manufacturing precision.

Green Living Tech manufactures custom architectural elements that unite refined aesthetics with practical performance. Our fabrication capabilities support distinctive interiors, exterior landscapes, and integrated living infrastructure features.

FROM DESIGN INTENT TO FABRICATED COMPONENT

01 / PRODUCT FAMILIES

Architectural Planters

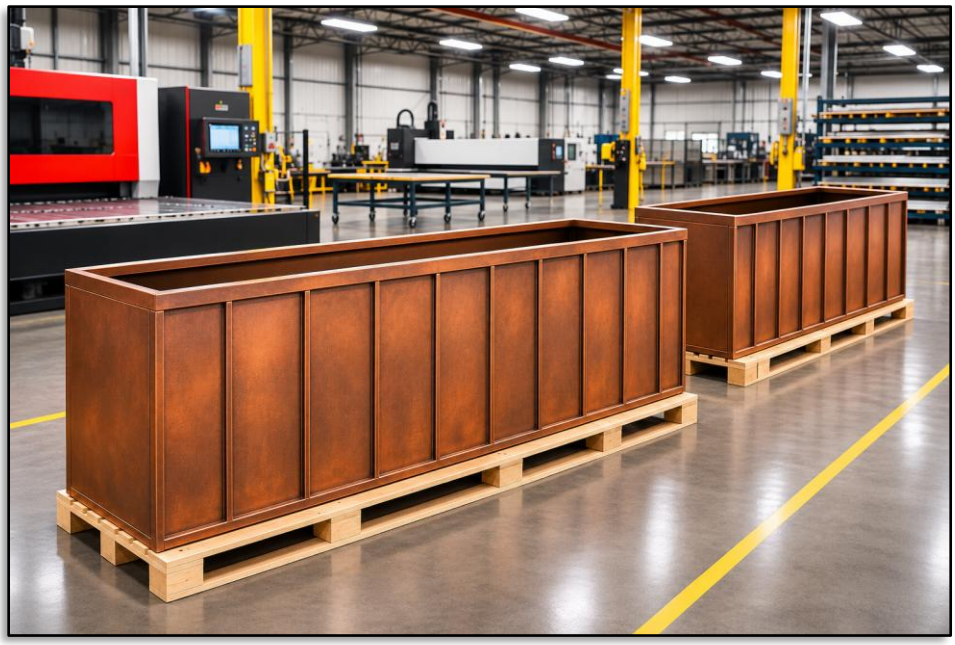

CUSTOM-BUILT FOR THE SPACE

- Interior and exterior applications
- Freestanding and integrated configurations
- Linear, geometric, and project specific forms
- Custom dimensions and finish coordination
- Design for planting and maintenance access

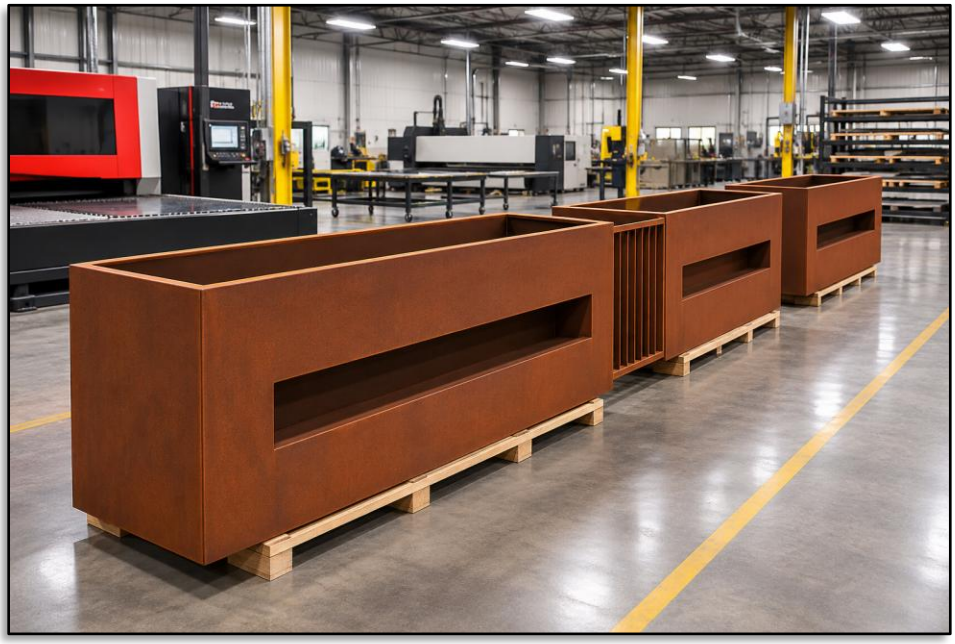

Final specifications are developed around project requirements and intended use.

CUSTOM-BUILT FOR THE SPACE

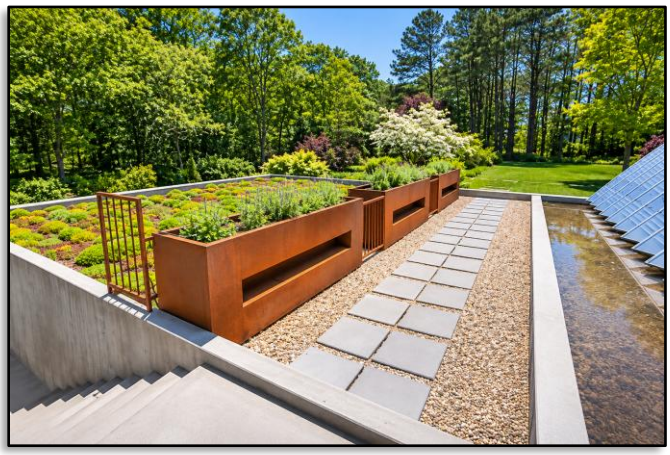

- Fine metal finishes
  - Copper (Fig 1)
  - Corten Steel (Fig 2)
- Freestanding and integrated configurations
- Linear, geometric, and project specific forms
- Custom dimensions and finish coordination
- Design for planting and maintenance access

Final specifications are developed around project requirements and intended use.

Architectural Planters

Custom architectural planters designed to complement the built environment.

From freestanding statement pieces to integrated landscape features, our precision-fabricated metal planters offer virtually unlimited flexibility in dimensions, configurations, colors, and finishes.

Precision fabrication / Coordinated finishes / Project-specific detailing

02 / SPECIALTY FABRICATION

Architectural Metalwork

Decorative screens, partitions, metal panels, enclosures, and custom architectural components can be designed to complement the surrounding building language.

Precision fabrication / Coordinated finishes / Project-specific detailing

03 / POWDER COATING

In – House Powder Coating

Green Living Tech's in-house powder coating capabilities provide exceptional flexibility in color, texture, and finish selection, with thousands of colors available to complement virtually any architectural design. From bold statement colors to subtle architectural finishes, our controlled coating process delivers consistent, durable, high-quality surfaces for interior and exterior applications. By integrating powder coating directly into our manufacturing operations, GLT maintains greater control over quality, finish coordination, and production schedules.

Precision fabrication / Coordinated finishes / Project-specific detailing

04 / INTEGRATED DESIGN

Moss Wall Overlays & Dimensional Features

Custom metal cut from our precision laser.

Custom metal overlays can add depth, pattern, lettering, logos, and architectural definition to preserved moss wall installations. Frames and accent elements are tailored to the composition and the surrounding interior.

Design coordination considers attachment, clearances, finish, and access.

05 / 3D SCULPTURES

Architectural 3D Artisan Planters

*Commissioned Art & Installation**
**Shown with underlighting*

Green Living Tech transforms architectural metalwork into extraordinary three-dimensional living sculptures. Each custom-fabricated artisan planter combines precision engineering, sculptural geometry, and integrated greenery to create a distinctive architectural centerpiece. From suspended botanical installations to freestanding sculptural forms, our designs can incorporate custom metal finishes, dimensional configurations, and integrated LED lighting.

Created in collaboration with artists, architects and designers, these signature pieces bring artistry, nature, and innovation together in a single architectural expression

05 / ARCHITECTURAL ACCENTS

Specialty Framing & Integrated LED Lighting

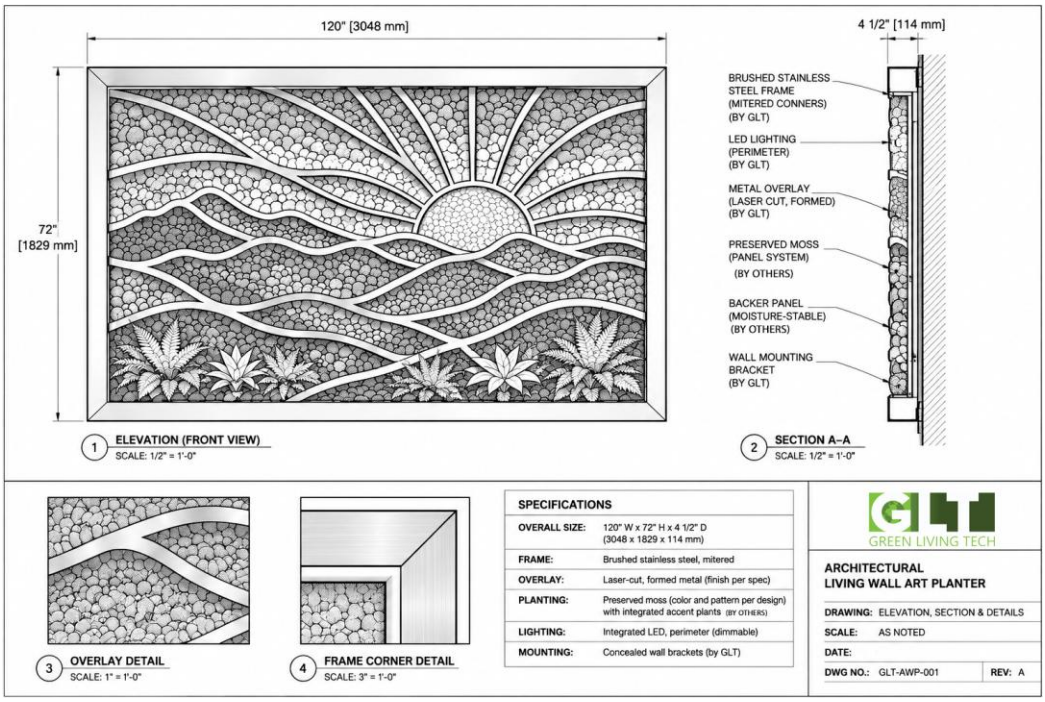

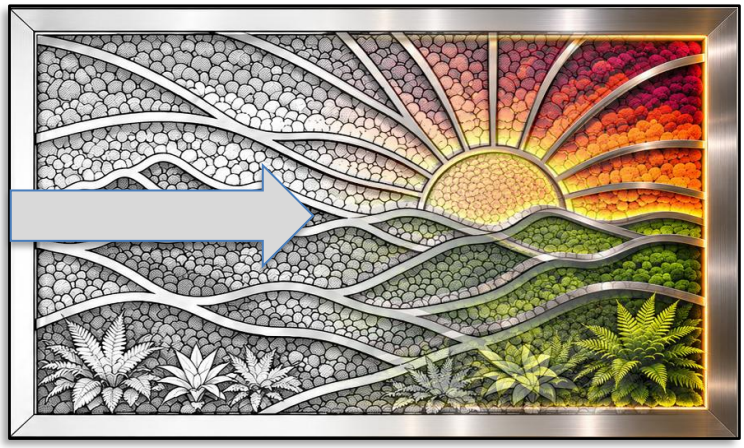

Architectural frames and concealed lighting details can transform decorative surfaces into focal features. GLT collaborates on fabrication interfaces for integrated LED channels, illuminated borders, and custom feature assemblies.

Lighting components and electrical coordination are specified by project.

06 / DESIGN, DELIVERY & COLLABORATION

Design Collaboration & Custom Manufacturing

From Architectural Vision to Manufactured Reality, Green Living Tech transforms creative concepts into precision-manufactured architectural products.

GLT provides the manufacturing expertise to bring distinctive architectural visions to life.
