GLT PLUG-AND-PLAY LIVING WALL COLUMN SYSTEM
Custom-engineered living wall columns featuring GLT's patented Plug-and-Play system.
Column circumference and configuration are designed to meet project-specific architectural and dimensional requirements.
Freestanding columns can be designed up to 12'-0" (3.66 m) in height. Taller configurations may be engineered with appropriate floor anchoring and structural support. Floor-to-ceiling installations are also available.
Available in 4", 6" and One Gallon (8") pot sizes.

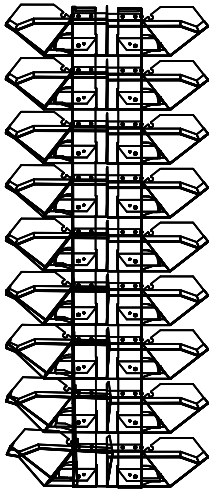

Optional Accessories: Decorative lighting, architectural top trim packages, integrated bottom catch basins, and custom-engineered zero-wastewater irrigation systems.
All configurations are subject to project-specific structural and installation requirements.
