

The Industry Is Suddenly Discovering Metal?

We've been engineering aluminum living walls for nearly 30 years.

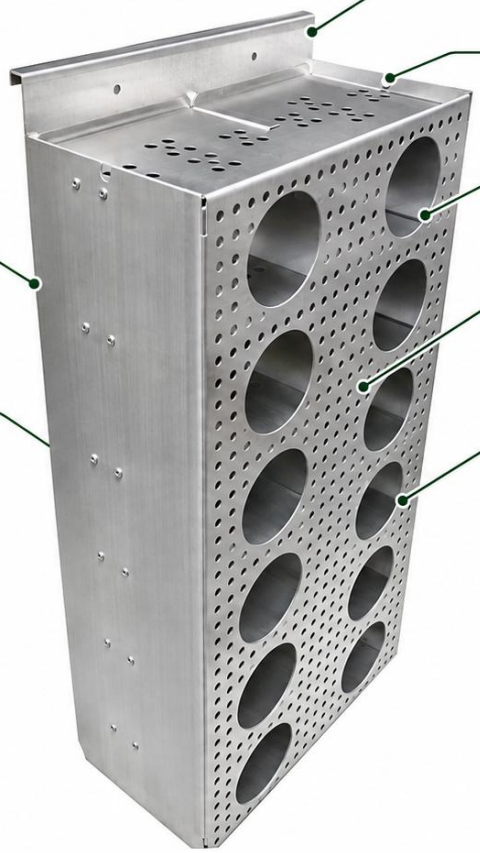

Not a recent redesign.
Not a response to changing industry trends

Nearly 30 years of patented engineering.

Fire Safety Isn't a New Feature.
It's an Engineering Responsibility.

Class A Fire Rating. Aluminum Construction. Nearly 30 Years of Engineering Experience

CLASS A	ALUMINUM	LIFETIME
Fire Rating	Since Day 1	Product Warranty

Our patented G2 perforated cover changes that.

- Retains and protects growing media against erosion.
- Allows roots and vegetation to migrate across the panel face and between adjacent panels.
- Encourages continuous plant coverage and healthier root development.

GREEN LIVING TECH

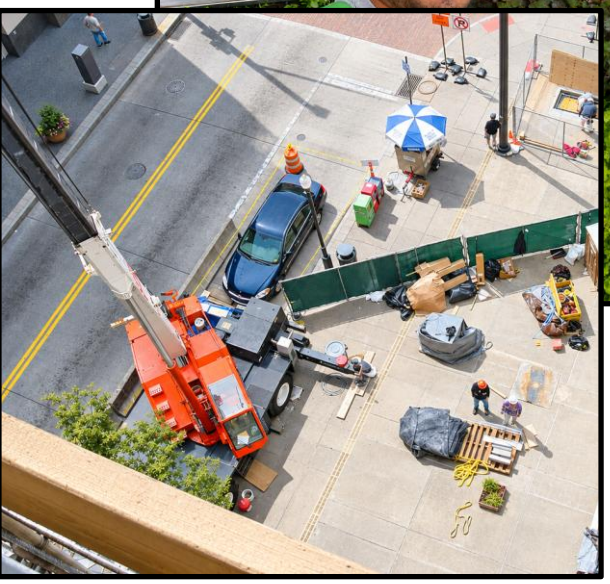

Engineered to Install. Not Improvise.

GREEN LIVING TECH

- **24+ standard panel sizes** — Plus custom factory configurations.
- **Purpose-built mounting system** — Secure mechanical attachment to engineered brackets.
- **Two dedicated corner panels** — Clean, consistent architectural transitions.
- **Integrated irrigation provisions** — Factory-designed for 17 mm supply lines.
- **No field improvisation** — Panels arrive configured for the project, reducing cutting, modifications, and installation labor.

We set the standard on quality, manufacturing, engineering and scale!

We manufacture the solution before it reaches the jobsite.
